Lab-1

1. Objectives

A. Use console output in C++.
B. Basic arithmetic operations

2. Lab Instructions

Problem 1 (15 pts)

Write a complete C++ program that displays the following message in console (empty cell represents a space). You are not required to print rows and column numbers. To pass the test add all trailing spaces to the output.

	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22
1			C	C	C	C					0	0	0	0					P	P	P	
2		C								0					0				P			P
3	C								0							0			P	P	P	
4		C								0					0				P			
5			C	C	C	C					0	0	0	0					P			

Problem 2 (15 pts)

Write a complete C++ program that displays your first name, last name, and number of seconds you are supposed to spend studying C++ in Fall 2026 semester. For example,

First Name: Igor

Last Name: Mirsalikhov

I am supposed to spend XXX seconds studying C++ Programming

To calculate number of seconds, consider conditions below. You should perform all calculations in your code:

1) 16 weeks of studying.
2) 3 lectures per week.
3) Every lecture takes 50 minutes.
4) Self-study 4 and a half hours per week.
5) There are no lectures on Labor and Veterans Days.
6) Thanksgiving week is free from lectures.

Make your program more interactive and get the name from the input.

```
std::cout << "Enter your first name" << std::endl;
getline(std::cin, fname);

std::cout << "Enter your last name" << std::endl;
getline(std::cin, lname);
```
